# THE RESIDENCY PROGRAM

Wyckoff Heights Medical Center offers a one-year Pharmacy Residency Program in Internal Medicine (PGY2). This new program offers a variety of learning opportunities at an established teaching hospital located in a diverse neighborhood in Brooklyn, NY. In this program, the resident will build their knowledge, skills, and confidence by working under passionate and expert pharmacy faculty in a multidisciplinary team, providing comprehensive medication therapy management across a broad spectrum of medicine populations.

**PGY2 pharmacy residency programs** build on Doctor of Pharmacy (Pharm.D.) education and PGY1 pharmacy residency programs to contribute to the development of clinical pharmacists in specialized areas of practice. PGY2 residencies provide residents with opportunities to function independently as practitioners by conceptualizing and integrating accumulated experience and knowledge and incorporating both into the provision of patient care or other advanced practice settings. Residents who successfully complete an accredited PGY2 pharmacy residency are prepared for advanced patient care, academic, or other specialized positions, along with board certification.
